SUMMARY

Fresh Computer Science graduate with experience in manual software testing, troubleshooting, data validation, and application development through academic and internship projects. Skilled in Python, SQL, and system monitoring, with hands-on experience identifying bugs, debugging issues, and ensuring data accuracy in collaborative development environments. Detail-oriented, adaptable, and quick to learn new technologies and testing processes in fast-paced team settings.

WORK EXPERIENCE

Junior Web Developer Intern

Jun 2024 - Jul 2024

GECO Philippines - Iloilo City, Iloilo

- Assisted in enhancing the frontend UI/UX of the company's ticketing system to improve usability and user experience.
- Performed manual testing of web application features to identify bugs, inconsistencies, and usability issues.
- Collaborated with team members using VS Code Live Share to troubleshoot and resolve system issues.
- Validated system inputs and outputs to ensure data accuracy and expected application functionality.

PROJECTS & RESEARCH STUDY

SALTIK: Salinity Analysis & Level Tracking Integration Kit – An IOT-Based Monitoring System with Intelligent Pump Automation For Aquaculture

Group Special-Problem Project (Thesis)

- Contributed in developing a real-time salinity monitoring system.
- Monitored, processed, and validated sensor-generated datasets with 98% measurement accuracy.
- Assisted in data calibration, troubleshooting, and ensuring reliable system outputs for operational use.
- Collaborated with team members in testing, documentation, and issue resolution under deadlines.

Medi-Go- Medicine on the Go

Group Project

- Assisted in the design and development of a mobile application for OTC medicine delivery using FlutterFlow.
- Contributed to the app's UI/UX design and overall user flow.
- Prepared and documented the Software Requirements Specification (SRS) for the project.

onlyFoods: Craving Finder

Group Mini-Project

- Assisted in designing the user interface and collaborated with the development team to ensure design consistency and functionality across the app.

FluSense: Forecasting Influenza Type A and B Cases

Group Mini-Project (Machine Learning)

- Performed time-series forecasting using multiple machine learning models.
- Conducted data preprocessing, analysis, and model evaluation using Python and Scikit-learn.
- Assisted in evaluating model outputs and documenting structured findings for reporting.

Agricultural Worker Compensation Across Philippine Region Analysis

Personal Project (Data Analysis)

- Processed and cleaned Kaggle CSV datasets with Pandas and integrated the cleaned dataset into MySQL for SQL-based analysis.
- Visualized insights in Power BI, revealing significant regional wage and income disparities among farmers, as well as gender gaps favoring male workers.

SKILLS

TECHNICAL SKILLS:

Testing & Development: Manual Testing, Debugging, Troubleshooting, Data Validation, VS Code, Jupyter Notebook

Software Dev & Database: Python, HTML, CSS, Flutter, MySQL

Data & Analytics: Pandas, NumPy, Matplotlib, Scikit-learn, Power BI

Tools & Platforms: Git, GitHub, Arduino IDE, Figma

SOFT SKILLS: Attention to Detail, Problem-Solving, Communication, Adaptability,

EDUCATION & CERTIFICATION

University of the Philippines Visayas - Miagao, Iloilo

Sep 2021 - Jul 2025

Bachelor of Science in Computer Science

DOST-SEI RA 7687 Scholarship (2021-2025)

Civil Service Professional Eligibility

Mar 2026
